## **DETAILED ACTION**

### ***Drawings***

Figures 4-11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Rejections***

#### ***Claim Rejections - 35 USC § 112***

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction or clarification is required.

In claim 1, the recitation "may be" online 18 is indefinite because it does not positively recite the claimed invention. It is unclear how the output voltage of the second integrator and the

Art Unit: 2816

voltage of the filter input terminal can be “added” since no means for performing the adding function is recited. Also, the description of the claimed invention is incomplete because the “first capacitor” and “second capacitor” are not connected to anything. Thus, the claimed capacitors” may not perform the recited function. The same is true for claims 2-3 and 6-12.

The remaining claims are dependent from the above claims and therefore also considered indefinite.

***Allowable Subject Matter***

Claims 1-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The claims are allowable because the prior art does not show the interconnections between the second transconductance circuit and the third transconductance circuit, and the output voltage of the second integrator is added or subtracted from the voltage of the filter input terminal as claimed.

***Conclusion***
